The Otis EWC Workers Representatives views with concern the ongoing restructuring of manufacturing in Italy, and condemn the decision to close Caponago and urge Otis to reconsider this decision.

We send our support to our Italian Colleagues in their endeavours to find a satisfactory conclusion at Caponago and share their concerns that the future of Otis in Italy appears to be changing to the detriment of employees.

We will continue our dialogue with Otis at EWC level to ensure that all transnational restructuring complies with EU Legislation.
